Dear Mr Puccio and Mr McDonald

ALCOA WAGERUP REFINERY OPERATIONS WATER REQUIREMENTS

Thank you for your attendance at the meeting held at the Department of Water office in Mandurah on 21 August 2015.

As a result of discussions at that meeting the Department of Water agreed to investigate the use of water at the refinery and establish where the water was sourced from in addition to the surface water and ground water taken under licence.

Alcoa have provided the Department of Water with a Water Inventory for 2014.

The inventory confirms the previous information provided to you in relation to the amounts of water taken under licence and reported to the Department of Water. It also identifies significant water sources from activities not required to be licensed or reported to the Department of Water.

Licensed ground water	479 ML
Licensed surface water	2,081 ML
Purchased water	2,025 ML
Rainfall collected from refinery and residue areas	4,371 ML
Soil moisture and in bauxite and caustic solution	1,087 ML
TOTAL	10,043 ML

I trust this will satisfy your enquiry on this matter, however if you wish to discuss this response, please contact myself on 9550 4222.

Yours sincerely

LEON BROUWER
